Coniferous Evergreens

The greatest advantage of using Evergreens in beautifying the home grounds is that Evergreens retain their foliage the year around. By planting the proper varieties in their proper places wonderful results can be obtained with but little expense. It is advisable however to plant Evergreens where they may get ample sunlight that they may show their best colors. If you are not familiar with Evergreens and wish to plant at the present time it is a pleasure for us to furnish you the information you may wish to help you get the desired results.
